11. Actuarial Assumptions, Data Collections, and Changes Since Prior Valuation:

Actuarial assumptions:

Retirement age - Age 65

Rationale - Normal retirement age for the plan.

Interest rate - 5.0%

Rationale - Based on long-term expected return on plan assets.

Salary scale - Not Applicable

Rationale - Plan is frozen to future benefit accruals for years after the valuation date.

Mortality table - No pre-commencement mortality assumed; Post-commencement mortality based on the RP-2014 adjusted to 2006 White Collar Mortality table, with generational improvements using scale MP-2016

Rationale – Reflects current expectations of population mortality

Turnover rates - None assumed

Rationale - Small block of participants.

Data collection:

Date and form of data

All personnel and asset data was prepared by the plan sponsor or a representative and was generally relied upon as being correct and complete without audit by Watkins Ross

Changes since prior valuation

Post-commencement mortality updated from the RP-2014 White Collar table projected using Scale MP-2015 to RP-214 adjusted to 2006 White Collar table projected using Scale MP-2016

12. Actuarial assumed rate of long-term wage inflation.

Not applicable. The Plan is frozen.

13. The smoothing method utilized to determine the funding value of assets.

The Plan is frozen; assets are valued at market value.

14. The amortization method and period utilized for funding the system's unfunded actuarial accrued liabilities, if any.

Not applicable. The Plan is frozen and there are no unfunded actuarial accrued liabilities.

15. Plan's actuarial cost method.

Pure Unit Credit

16. Whether system membership is open or closed to specific groups of employees.

The Plan covers all nonunion employees who have attained age 21, but accruals are frozen.
